

(A) ADDITIONAL-PIPELINE INSTANTIATION ON CONTRACT AUDIT

I1 Identity hash	n=2,431	fail=0
I2 Explanation closure	n=4,176	fail=0
I3 Tool-gap non-negativity	n=555	fail=0
I4 Source trace	n=1,876	fail=0
I5 Cross-pipeline join	n=6,677	fail=0

Checked units differ by invariant; zero failures establish record-contract properties, not semantic correctness.
